EXTENDED WRITING: ALIENS

B2 | Adults / Teens | Discussion Writing | 20-30 minutes | Set 2

Write developed answers. Support your ideas with reasons, examples, or a personal experience.

1. Do you believe there is other life in the universe?

2. What do you think aliens might look like?

3. What is your favourite alien film?

4. What might happen if humans met aliens from another world?

5. Do you think governments have hidden evidence about UFOs?

6. Why would aliens want to visit Earth?

7. How could people protect themselves from an alien invasion?

8. How could humans communicate with aliens?

EXTENDED WRITING: ALIENS

B2 | Adults / Teens | Discussion Writing | 20-30 minutes | Set 2

Possible B2 answers: Notice how each response gives a clear idea and support.

1. Do you believe there is other life in the universe?

Example: I think it is possible that life exists elsewhere because the universe is extremely large and contains many planets.

2. What do you think aliens might look like?

Example: Aliens might look very different from humans because they could have evolved in completely different conditions.

3. What is your favourite alien film?

Example: My favourite alien film is Arrival because it explores how people might communicate with beings whose language is completely different.

4. What might happen if humans met aliens from another world?

Example: A meeting with aliens could create fear at first, but it might also encourage countries to cooperate and reconsider what humans have in common.

5. Do you think governments have hidden evidence about UFOs?

Example: I am sceptical that governments have hidden clear evidence, although official reports sometimes create more questions than answers.

6. Why would aliens want to visit Earth?

Example: Aliens might visit Earth out of scientific curiosity, in the same way humans explore unfamiliar places.

7. How could people protect themselves from an alien invasion?

Example: People would need reliable information, international cooperation and calm leadership rather than panic.

8. How could humans communicate with aliens?

Example: Humans could use mathematics, pictures, patterns and repeated signals to establish basic communication.
